

SD Front Mask, M67 Filter Adapter for GoPro HERO9/HERO8

INON INC. is pleased to announce SD Front Masks, M67 Filter Adapters for GoPro®HERO8 and GoPro®HERO9 to be released in January 2021.

The new SD Front Masks enable GoPro®HERO8 and GoPro®HERO9 owners to enjoy dedicated semi-fisheye lens “UFL-G140SD” which increases underwater angle of view and drastically minimize shooting distance, and wide close-up lens “UCL-G165SD” which provides ideal coverage and shooting distance for taking images of marine lives. The M67 Filter Adapters are to attach INON UW Variable Red Filter M67 on GoPro®HERO8/GoPro®HERO9 to easily obtain natural color without blueish color cast.
